Dog Living Rooms (x3) <i>Two more available!</i>	\$10,000 each	
Companion Animal Adoption Rooms (x4)	\$10,000 each	

Building	This new building will not only provide the animals with a better, healthier experience, but it will also allow us to expand community programming and positively impact the animals of midcoast Maine for decades to come.
Cat Wing	This wing, dedicated to our feline friends, includes an air filtration system that purifies and exchanges air 10-15 times per hour, flexible housing options, dedicated isolation spaces for disease management, and relaxed spaces for humans and animals alike.
Behavior and Training Institute	Did you know that behavior management problems are one of the top reasons that animals are surrendered to shelters? This space allows our top-notch behavior team to help keep animals in homes and strengthen the human-animal bond. Behavior appointments, group training sessions, and educational opportunities will take place here, generating revenue while helping pet owners.
Medical Center and Surgery Suite	With expanded capacity and specialty equipment, this space will allow the clinic team to provide full veterinary services to the animals in-house without moving them off-site. The addition of new dental surgical equipment will revolutionize care and treatment for all animals, but is especially important to felines, as dental disease is the most common condition found in shelter cats.
Dog Play Yards	This large exterior play area will allow for both individual and group interactions for dogs of all sizes and temperaments, and will provide a space for canine meet and greets prior to adoption.
Humane Education Center	Investing in humane education now guarantees that animals will have a brighter future for generations to come. This versatile space will host summer camps, after school programs, teen volunteer days, girl scout and cub scout groups, and much more.
Cat Adoption Program	This program is responsible for finding homes for thousands of adoptable cats each year regardless of their age, disability, length of stay or medical condition.
Staff Care Area	Working in a shelter can be mentally and physically draining. The staff care area will provide staff with a space to decompress, thereby delaying compassion fatigue.
Dog Walking Trails	Beautiful walking trails allow adopters to get to know their future pets, and dogs in our care get the daily exercise they need. Several benches sit in quiet corners along the paths.
Admissions and Evaluation Center	The purpose of this space is two-fold: to provide a private area and compassionate space for emotional situations such as surrendering animals, and to allow staff to complete a medical exam before animals enter any other area of the building.
Volunteer Room	A dedicated space for the many people that volunteer their time and contribute over 10,000 hours annually.
Small Animal Room	Rabbits, ferrets and other small animals will have a room of their own on our adoption floor, one they won't have to give up to make room for kittens during the peak of 'Kitten Season.'
Laundry Room (x2)	On the average day, we perform countless loads of laundry to make sure the animals in our care are clean and comfortable. Extra space and new, efficient machines will increase productivity and impact the comfort of the animals.
Group Cat Rooms (x2)	These rooms will host several free-roaming cats, allowing these social creatures to interact with one another and meet adopters in a shared space with plenty of room to romp and stretch.
Cat Living Rooms (x4)	These large, private spaces are ideal for shy or fearful cats, as well as bonded pairs, seniors and special needs cats.
Dog Living Rooms (x3)	Low-stress housing for dogs who require extra space or prefer to be away from other animals. These rooms will also provide our longest term residents with a more 'normal' living situation.
Companion Animal Adoption Rooms (x4)	A dedicated space for adopters to meet and interact with potential animal adoptees in a quiet environment.
